

VIGNESHWARAN RAVICHANDRAN

Senior Software Engineer | Python Generative AI Engineer

LTM | Chennai, Tamil Nadu, India

+91 9150105243 | vigneshravichandran541@gmail.com | <https://www.linkedin.com/in/vigneshwaran-ravichandran-332b3a20b/>

PROFESSIONAL SUMMARY

Python Generative AI Engineer with 4+ years of experience in software development and AI application engineering. Experienced in designing and developing LLM-powered applications using Python, FastAPI, LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Vector Databases, and Prompt Engineering.

Skilled in developing enterprise-grade AI applications using advanced retrieval architectures, agentic workflows, multi-agent systems, and knowledge augmentation techniques to automate business processes and improve decision intelligence.

Strong expertise in Python, LangChain, LangGraph, FastAPI, Angular, GitHub Copilot, and Anthropic Claude Code, with a passion for developing scalable, intelligent, and business-focused AI solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript

Generative AI: Large Language Models (LLMs, Prompt Engineering, Retrieval Augmented Generation (RAG), Agentic RAG, Graph RAG, AI Agents, Multi-Agent Systems, Agentic AI Workflows, Function Calling, Tool Calling, Context Engineering, Semantic Search, Vector Databases

GenAI Frameworks: LangChain, LangGraph, LangSmith, OpenAI API, Anthropic Claude API, MCP (Model Context Protocol), Agent2Agent (A2A) Protocol

Backend Development: FastAPI, REST APIs

Databases: PostgreSQL

Frontend: Angular

AI Development Tools: GitHub Copilot, Claude Code, MCP Servers

Testing & Quality Assurance: Pytest, Jasmine, Karma

Version Control & DevOps: Git, GitHub, Azure DevOps, Rally

Development Practices: Agile Methodology, Code Reviews, Technical Mentoring

Cloud & AI Platforms: AWS Bedrock, AWS AgentCore

PROFESSIONAL EXPERIENCE

LTM

Senior Software Engineer | Jan 2026 – Present

- Designed and developed AI agents, multi-agent systems, and agent orchestration workflows using LangChain and LangGraph to automate complex business processes and decision-making.
- Implemented Agentic RAG and Graph RAG architectures to improve enterprise knowledge retrieval, contextual reasoning, and answer grounding.
- Developed scalable Retrieval-Augmented Generation (RAG) pipelines using document ingestion, chunking strategies, embeddings, vector databases, and semantic search.
- Developed REST APIs and AI application backends using FastAPI to expose LLM-powered services and retrieval pipelines.
- Integrated OpenAI APIs and implemented advanced prompt engineering techniques to improve response quality, optimize token consumption, and minimize hallucinations.

- Managed context windows, conversation memory, and token utilization to generate grounded, context-aware responses from LLMs.
- Leveraged Model Context Protocol (MCP) servers and AI-assisted development tools such as GitHub Copilot and Claude Code to accelerate development workflows.
- Developed and maintained enterprise-scale Angular applications for FinTech platforms serving global enterprise clients. Collaborated with cross-functional teams to design, develop, and deploy enterprise-grade AI solutions for client-facing products.
- Provided technical mentorship and guidance on Generative AI, AI Agents, RAG architectures, and best practices.

Software Engineer | Sep 2022 – Dec 2025

- Built AI-powered enterprise knowledge assistants using Vector Search, semantic retrieval, and Retrieval-Augmented Generation (RAG) techniques.
- Developed and maintained enterprise-scale Angular applications for insurance platforms serving global enterprise clients.
- Leveraged GitHub Copilot, Claude Code CLI, and MCP servers to improve developer productivity, code quality, and engineering efficiency.
- Built reusable UI components, directives, services, and pipes following scalable front-end architecture principles.
- Implemented reactive state management using RxJS and NgRx.
- Integrated RESTful APIs and optimized application performance, maintainability, and user experience.
- Collaborated within Agile teams to deliver high-quality software solutions aligned with business requirements.
- Ensured compliance with organizational code quality standards by maintaining 80%+ unit test coverage across Angular modules.

Mindtree

Software Engineer Intern | Mar 2022 – Jun 2022

- Completed intensive MEAN Stack training and contributed to full-stack web application development projects.
- Built reusable components and end-to-end solutions using MongoDB, Express.js, Angular, and Node.js.
- Assisted in software development activities, code reviews, testing, and Agile team collaboration.
- Gained hands-on experience in software engineering best practices, full-stack development, and Agile delivery methodologies.

AWARDS & CERTIFICATIONS

- Shooting Star Award – Team Contributor, LTIMindtree
- GitHub Copilot Certification
- LTIMindtree Certified Agile Practitioner (LCAP)
- RxJS 7 and Observables Certification (Udemy)
- Angular Skill Certification (HackerRank)

EDUCATION

Bachelor of Engineering (Computer Science Engineering) Aug 2018 – Apr 2022

Prince Shri Venkateshwara Padmavathy Engineering College CGPA: 8.07
